Thus when a ladder standing upon the ground leans against a house, we have at least three forces acting upon the ladder: 1st, the earths attraction, or, as we call it often, the weight of the body, which acts as if the whole substance were at the centre of gravity; 2d, the push of the ground against the foot of the ladder, which push is not straight upward; 3d, the push of the wall against the top of the ladder. Again, a flying kite is acted upon by the earths pull, straight downward; by the force exerted by the air, which force, because of the wind, is not straight upward; by the pull of the string, which pull is not straight downward.
