Excerpt from Graduate School of Arts and Sciences: Northeastern University, 1982-84 The following summary of research represents just a small sample of the multitude of projects now underway throughout the University. In the College of Arts and Sciences, research projects reflect the diversity of its nineteen departments. Research in the humanities and natural and social sciences includes studies in nineteenth century Boston architecture, the off-off Broadway theater, cable tv, quantum field theory, and infrared spectroscopy. As part of the College s interdisciplinary interest in marine sciences, the Marine Science and Maritime Studies Center has been established. At the Nahant field station and laboratory of this Center, faculty and graduate students perform studies in marine chemistry, biology, and botany.
