URBAN ATMOSPHERIC RESPIRABLE PARTICULATE MATTER PHYSICAL AND CHEMICAL CHARACTERISTICS AND BIOLOGICAL ACTIVITY OF

To read **urban atmospheric respirable particulate matter physical and chemical characteristics and biological activity of** eBook, remember to access the button listed below and download the ebook or get access to additional information which are have conjunction with URBAN ATMOSPHERIC RESPIRABLE PARTICULATE MATTER PHYSICAL AND CHEMICAL CHARACTERISTICS AND BIOLOGICAL ACTIVITY OF eBook.

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number : 200 Publisher: Meteorological Press Pub. Date :2008-01. respirable particulate matter in northern China is the most important urban air pollutants on human health. environment. climate. etc. have a serious impact. Book to the atmosphere in Beijing as an example. respirable particulate matter physics. chemistry and mineralogy and potential health effects (biological activity) of the research methods. the use of field emission scanning electron microscopy and transmission electron microscope single particle analysis techniques can reveal inhaled particles of the main morphology types. image analysis put forward different types of particle size distribution characteristics; using x-ray diffraction and with energy spectrum of the scanning electron microscope analysis that can be inhaled particulate mineral composition; the use of proton-induced X-ray fluorescence and means of ICP-MS study of respirable particulate matter trace elements; Finally. plasmid DNA damage evaluation by the research that can be inhaled particulate matter and other potential health effects. Book data informative. content rich. advanced methods. with strong scientific. informative and practical. Book for atmospheric science. environmental science. atmospheric chemistry and environmental geology and other fields of scientific and technical personnel. teachers and students as well as relevant professional higher education in the management of environmental protection officers. Contents: Preface 1 Introduction 1.1 atmospheric particles the basic characteristics of 1.2 single particle analysis and its impact can be inhaled particles of 1.3 single particle analysis technology 1.4 atmospheric particles of problems in two of Beijing area. satellite. background point pm10 and pm2.5 pollution levels outlined in the study area 2.1 2.2 District of Beijing samples of atmospheric particulate matter pollution in Beijing area and the level of 2.3 Nan Town. Four Satisfaction guaranteed, or money back.
