Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Statistics of Malignant Deciduoma If we were to attempt a definition of this recently recognized neo plasm, we should say it is an exceedingly malignant growth from the pregnant or recently pregnant uterus, composed largely of proliferating decidual or placental tissue. Of rapid growth and development, manifesting a marked tendency to the formation of metastatic deposits throughout the tissues and organs of the body. And quickly resulting fatally if prompt and radical measures of treatment be not instituted. A recent impregnation seems to be an essential feature in the etiology of the condition. And it matters not whether this impregnation be carried to full maturity or not. Indeed, the vast majority of the cases recorded have followed a premature termination of the gestation, either by simple abortion or more commonly after a cystic degeneration of the chorion has occurred, as has been already noted. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
