(1) Be anxious to increase your stock at first rather than to take a large quantity of honey. (2) Get well acquainted with your bees, and make them acquainted with you. Handle them gently, and do not blow on them. Leave them alone when they are cross. (3) Always in swarming time have a spare hive at hand. (4) If you have boxes to pile one on top of the other, never disturb the lower box, except when, after two or three years, the combs have grown old and want renewing; then, late in the autumn, when the breeding season is over, take the combs away from the lower box instead of the second. To Take Honey. (5) Take off the cover, blow some smoke into the upper box between the bars to drive the bees into the lower box. Have a table ready, with a cloth upon it; lift the box on to this, and carefully cut out the outside combs, stopping directly you come to those which have brood in them. Return the box with the brood-combs undisturbed. This may be repeated as often as you see through the window (of the hive) that the honeycombs are sealed over. (6) After the breeding season is over all the boxes except the lower one may be entirely emptied in situations where, as at Paihia, the bees work through the winter. (7) Keep a stock book regularly, and write down immediately anything curious which is observed. (Signed) William Chas. Cotton....
