Is it not an interesting matter of fact that bilingual children apparently learn a second language easier than monolingual But after reading those texts have you ever asked yourself where exactly the differences between monolingual and bilingual children in second language acquisition (SLA) are I did and therefore I investigated in comparing data of a monolingual and a bilingual child. Consequently in my analysis I will not focus on one particular error but I will take in account all errors made by my subjects. I will start my paper with giving you some background information about the subjects native languages. The monolingual child s native language (NL) is German, the bilingual child s mother tongues are German...
