Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Sewage Purification: Brought Up to Date, 1896 It is not the wish of the writer in the following pages either to appear as the advocate solely of land treatment, or as being desirous of throwing indiscriminate discredit upon chemical processes which, as all sanitary engineers must acknowledge, are oftentimes advantageous, and sometimes unavoidable; but it is his aim to prove that except in those few cases where suitable soil cannot be obtained at anything like a reasonable price, or within a reasonable distance, land can still be relied on to permanently cleanse sewage at a moderate outlay; and at the same time to secure the effluent finding its way into any neighbouring stream being well within the limits of the well-known standards suggested by the Rivers Pollution Commissioners in 1876, and recognised by the Government of the day, as applicable to inland towns. It cannot, however, be denied that, owing to neglect in the efficient maintenance of sewage farms by the local authorities responsible for their success after the engineer who designed them has completed his duties, the extension of land treatment has received a check during the last few years; but the writer is convinced that this temporary withdrawal from favour will cease when the public have realised the necessity of more careful management, and have had more experience of the great annual cost incurred in the proper conduct of chemical works.
