The heater is shown in Fig. 6, giving a bottom view without the sliding door in front, and with boards one foot wide nailed on the top through the zinc. Fig. 7 gives a top view of the same after strips two inches wide have been fitted in at each end of the zinc to make a level surface all around the edge. Next nail strips, also two inches wide, all around the edge, except at a, which is an opening one and one-half inches wide to admit fresh air; b is a strip ten inches long nailed on to conduct the fresh air to the zinc. Now if this is covered with matched boards there will be a chamber two inches deep over the...
