paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Paperback. Pub Date: October 2012 Pages: 197 Language: Chinese in Publisher: Higher Education Press product manufacturing process is an implementation of the process of the design attributes of product quality. cost. and reliability. excellent performance of the product manufacturing process bad will directly determine the competitiveness of our products. The Six Sigma methodology is a structured process-oriented continuous improvement method. it is the pursuit of the target is close to perfect. so it is more and more welcomed by the manufacturing sector. The past 20 years. many world-class companies practice Six Sigma management methods. and achieved remarkable results of operations. China has many enterprises in the application or being imported Six Sigma methods to gain an advantage in the market competition. Six Sigma methodology. however. is not perfect. its weaknesses sometimes makes improvement difficult to achieve a breakthrough. especially when the process level reached five sigma. Determine a method of solving the most important problem is the method's core technology. Brings together traditional quality control and statistical tools based Six Sigma methodology for continuous innovation to continuously improve product quality. reduce the cost of the voice of the customer. making the traditional Six Sigma DMAIC model is difficult to correspond This explains the higher level improvement when the traditional tools of quality control and statistical tools to the limit of their capabilities. At this time. if not better systematic approach and innovative technology to the traditional model of Six Sigma strong support. Then the improvement will be difficult to carry out. Inventive Problem Solving (TRIZ) been summarized on the basis of research on a large number of high level patented technology are summarized and the formation of a powerful...
