Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Accounting Principles and Practice, Vol. 2 The present volume is the second of a series on accounting, and continues the work covered in Accounting: Principles and Practice, Volume I, which was published toward the end of the past year. Volume II covers the second semester work of the first year of a collegiate course in accounting. It presents briefly in fifteen chapters, with questions and problems, the principles underlying record construction, accounting for partnerships, branches, consignments, and joint ventures, and the control of manufacturing records on the general books. Since the author has outlined in considerable detail, in the first volume of this series, his aims and purposes in the presentation of the material covered in both volumes, it is necessary merely to add here that Volume II has been prepared with these ends in view, and is in every way a direct continuation of Volume I. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
