

Louisiana Conservationist, Vol. 54: May/June 2002 (Classic Reprint) (Hardback)

By Janice Collins

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Louisiana Conservationist, Vol. 54: May/June 2002 Bears have an affinity for honey and protein-rich honeybee larvae, but can be repelled with a good jolt of electricity. Bears generally get into beehives in early spring when there is not much natural food available. Agency biologists can provide equipment and assistance to beekeepers experiencing problems with bears. The most widely accepted mechanism to deal with unacceptable behavior in bears is a process called aversive conditioning. Aversive conditioning can involve any number of activities, all unpleasant experiences for the bear. The theory is that the bear, being a very intelligent animal, will avoid the circumstances where he may encounter a repeat of the negative experience. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
